

Terms of Chapter 2 (and part of Chapter 1)

epithelial tissue	esophagus
connective tissue	liver
smooth muscle	gall bladder
skeletal muscle	pancreas
cardiac muscle	peristalsis
nervous tissue	stomach
tissue	small intestine
meristematic tissue	large intestine
epidermal tissue	appendix
ground tissue	rectum
vascular tissue	cuticle
stomate	guard cells
xylem	stamen
phloem	filament
mesophyll	anther
pharynx	pistil
larynx	stigma
epiglottis	style
trachea	ovary
bronchus	ovule
bronchiole	sepal
alveoli	petal
diaphragm	transpiration
arteries	integumentary system
veins	endocrine system
capillaries	lymphatic system
atrium	circulatory system
ventricle	respiratory system
vena cava	nervous system
aorta	excretory system
tricuspid valve	homeostasis
pulmonary valve	kidney
mitral valve	systolic
bicuspid valve	diastolic
aortic valve	
pulmonary artery	
pulmonary vein
