- False: The molecular species that exists at a maximum of potential energy is called the *activated complex*.
- True
- False: Elementary steps in reaction mechanisms generally involve *one* or *two* molecule collisions.
- True
- True
- False: The enthalpy change is *the same* for a catalyzed chemical reaction.
- True
- True
- False: The rate-determining step in a mechanism is the *slowest* step.
- False: A homogeneous catalyst is one in which the catalyst and the reactants are in *the same* phase.
