

Welcome to Grade 11 Chemistry Class (SCH3U1)

Units of Study: These are the chemistry topics you will study this year.

Unit #	Unit Name	Approx. No. Of Periods	Textbook Chapters	Assessment Weight
1	Matter and Chemical Bonding	17	1-2	11
2	Nomenclature – Naming Chemical Compounds	5	2.5	9
3	Chemical Reactions	12	3	11
4	Quantities in Chemical Reactions (Stoichiometry)	20	4-5	12
5	Solutions and Solubility	20	6-8	12
6	Gases and Atmospheric Chemistry	10	9-10	10
7	Science and Society – Reading	-	Napoléon's Buttons	5
8	Final Exam	-	1-10	30

Teacher: Mr. White

- Office – room 7-5
- Help Time – First period, After school, lunch time

Evaluation and Assessment:

- Late labs and assignments will be penalized 10% per day for 3 days. After 3 days they will be given a mark of zero.
- All students will write tests on the date given. If you know that you will be absent for a test you must make arrangements to write it ahead of time, or you will write it **on the day you return**. Most important: **Talk to me**.
- Invalid absences will result in a **zero** for any missed assignments, quizzes, or tests. It is the student's responsibility to validate absences.

Labs, Projects, Assignments:

- You are responsible for completing **all** work in this course. Failure to do so may result in no credit given. When you miss a class, check with someone in your class to see what you missed and complete the work. With this in mind, each student will be expected to have a "Homework Buddy". If you are on a school team, make sure your class contact is not on the same team or misses the same class(es) that you do. **After** studying the related textbook reference and completing the missed assignment, see your teacher if you need clarification concerning the missed work.
- All labs, projects or assignments to be handed in must be handed in at the beginning of the class they are due or they are considered late. Work **copied from any source** (i.e. other students, print or electronic resources) and submitted, as original work **will receive a mark of zero**. (**Please note:** When another student's work is copied, both the student copied and the student copier will receive a mark of **zero**.)
- Once any of the answers to assignments, labs or tests are returned and/or discussed in class, any student that has not handed in the assignment / lab or written a test / quiz will receive a mark of **zero**.
- If you miss an experiment, you must obtain the experimental data from someone in your class and hand in the lab. You will be assessed on your lab write up. If you don't hand in a lab which you missed, or, miss a lab due to an unexplained absence, a mark of **zero** will be assigned.

To be successful this year in Chemistry...

- Do your homework and hand in all labs and assignments
- Have a "homework buddy" (Set this up on the first day of class)
- Obtain the online notes
- Be prepared for class
- Marks, solution sets and additional information will be found on the Forest Heights Science Teachers website list:

<http://fhc.wrdsb.ca/science/fhci-science-teachers>

Course Fees

- There are no lab fees for this course.

Homework Buddy:

Name: _____

Phone: _____

Online Marks:

Student Number: _____

Edmodo Class Code: _____

Note: Look after all textbooks, materials, and equipment. If any textbook, material, or piece of equipment has been marked up, lost, or damaged, the **student will be charged a fine or held responsible for a replacement (approx. \$70 for a textbook)**.
