

Homeostasis - organ systems working together to maintain balance

Looking at page 47 and after watching the video on homeostasis describe three examples of organ systems that work together to maintain a healthy body

1. (Liver and Blood)

2. (Skin and Temperature)

3. (Kidney and Water)

What is cellular respiration? Page 64

What is the role of the respiratory system and circulatory system in cellular respiration?

respiratory system -

circulatory system -
